Supplemental figure 1 – Kaplan Meier plots for individual diagnoses in the NEPTUNE validation cohort

Kaplan Meier plots for the four disease subgroups in the NEPTUNE cohort based on DCXR tertiles. (A) FSGS = Focal-segmental glomerulosclerosis, (B) MCD = Minimal change disease, (C) MN = Membranous nephropathy, and (D) other diseases. P-values in the Kaplan Meier analysis are based on the log-rank test statistics.
