

Supplementary Table 1- Participant Characteristics

Disease Category	UC	AC IPVL	AC hPVL	HAM
Participant Number	28	35	24	14
Age (years)- mean, range	43.6, 24-68	53.9, 24-79	54.0, 27-81	66.4, 52-88
Sex – number, percentage				
Male	7, 25%	8, 23%	6, 27%	3, 27%
Female	21, 75%	27, 77%	22, 73%	11, 73%
PVL (% of PBMCs)- mean, range	NA	0.65, Undetected-2.92	9.65, 3.16-22.89	12.62, 3.51-53.12

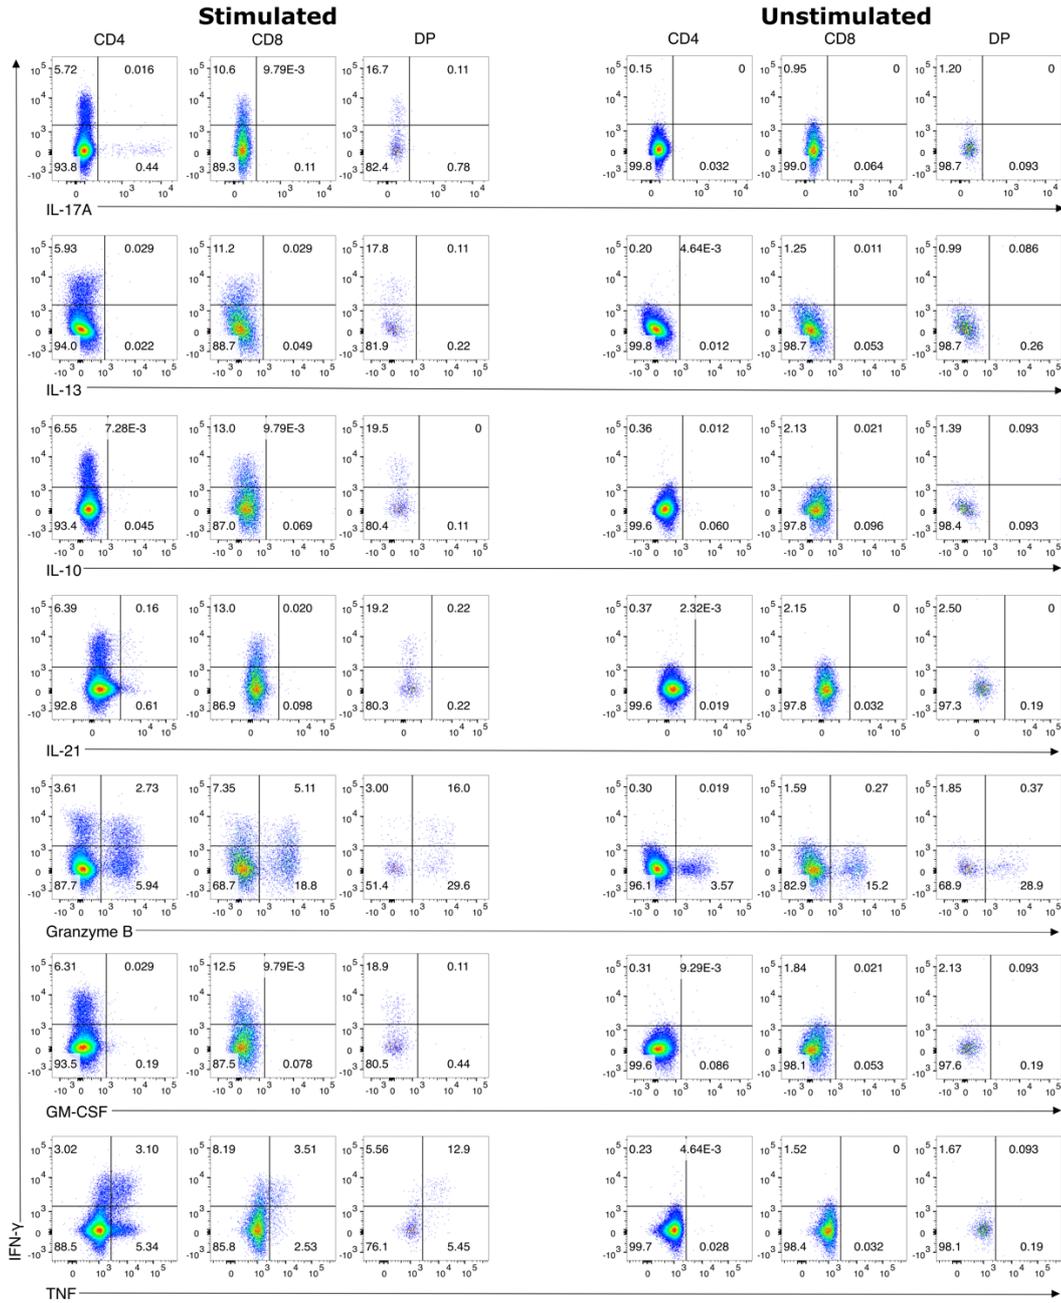

Supplementary Figure 1. PVL of PBMCs and DP T cells gating and infection. **a.** Box and whisker plot showing the HTLV-1 PVL in total PBMCs ($n=20$ AC IPVL, $n=18$ AC hPVL, $n=13$ HAM). Representative flow plot (**b**) and box and whisker plot (**c**) showing the frequency of DP T cell sub-populations, CD4⁺CD8^{dim}, CD4⁺CD8⁺ (CD4^{bright}CD8^{bright}), and CD4^{dim}CD8⁺ in different groups ($n=14$ UC, $n=19$ AC IPVL, $n=18$ AC hPVL, and $n=13$ HAM). **d.** Box and whisker plot showing the proportion of Tax expression contributed by each T cell population in different HTLV-1-infected groups ($n=15$ AC IPVL, $n=16$ AC hPVL, $n=13$ HAM). **a, c, d**) Wilcoxon signed-rank unpaired test; for **a** and **d** comparisons were made between AC IPVL and AC hPVL, and AC hPVL and HAM. For **c** comparisons were made between UC and AC IPVL, AC IPVL and AC hPVL, UC and HAM, and AC hPVL and HAM; * $P<0.05$, ** $P<0.01$, *** $P<0.001$, **** $P<0.0001$.

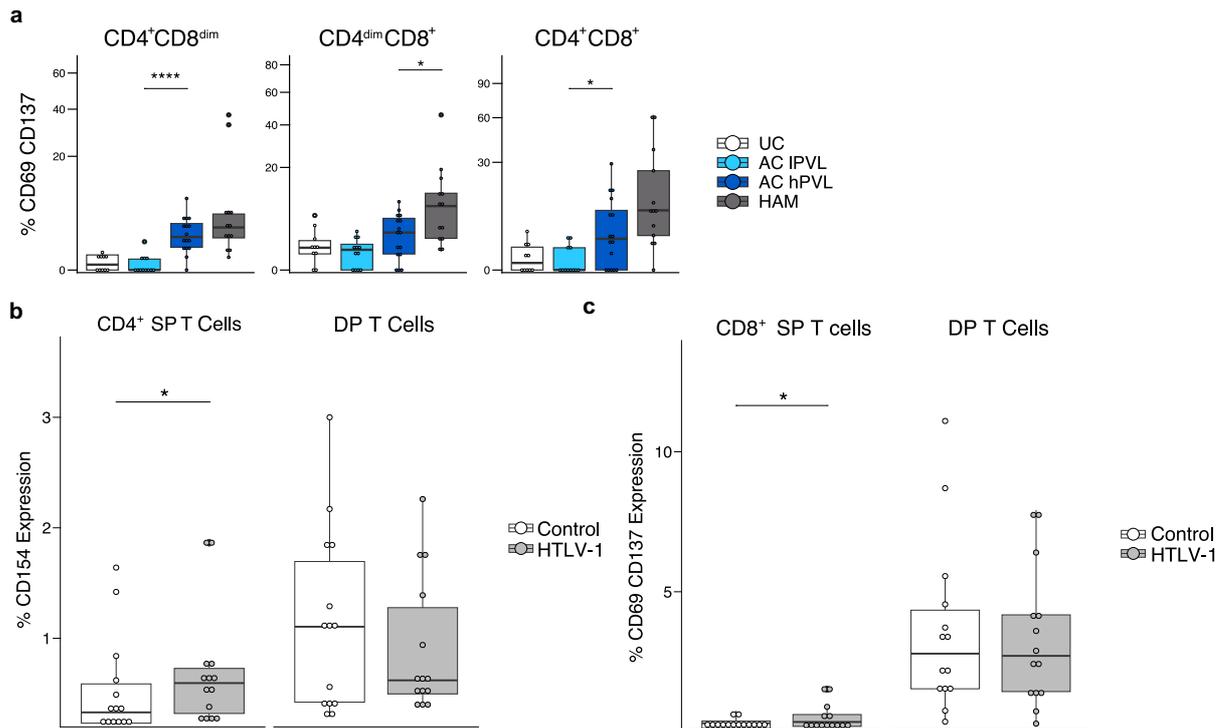

Supplementary Figure 2. Ex vivo phenotyping. Representative flow plots of DP T cells from UCs and HTLV-1-infected groups expressing various ex vivo markers.

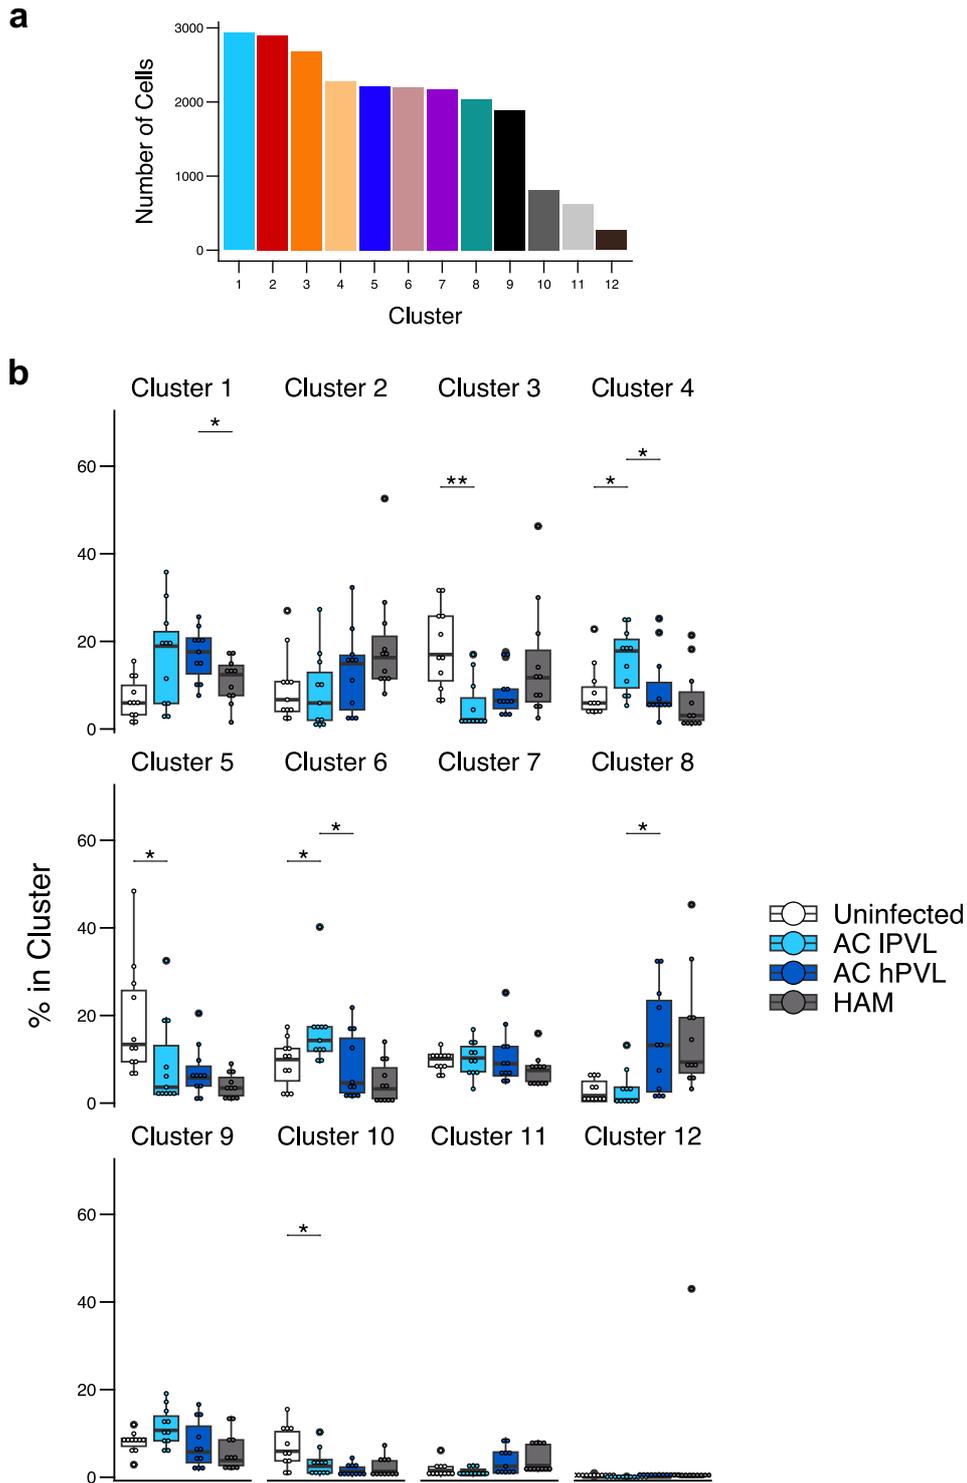

AC hPVL

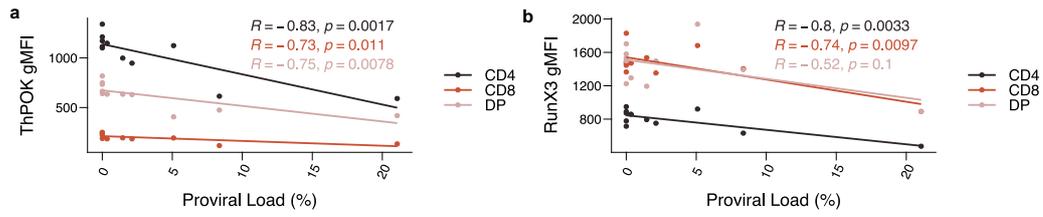

Supplementary Figure 3. Cytokine phenotyping in AC hPVL. Representative flow plots showing cytokine expression by DP T cells from an AC hPVL after stimulation with PMA and ionomycin for 4 hours.

Supplementary Figure 4. Activation marker expression. **a.** Box and whisker plot comparing the frequency of CD69⁺CD137⁺ cells in DP T cells subpopulations between patient groups ($n= 11$ UC, $n= 12$ AC IPVL, $n=16$ AC hPVL, $n=13$ HAM). **b.** Box and whisker plot showing CD154 expression by CD4⁺ SP and DP T cells after stimulation with heat-inactivated HTLV-1 or a control ($n=14$). **c.** Box and whisker plot showing CD69 and CD137 co-expression by CD8⁺ SP and DP T cells after stimulation with heat-inactivated HTLV-1 or a control ($n=14$). **a)** Wilcoxon signed-rank unpaired test for comparisons between UC and AC IPVL, AC IPVL and AC hPVL, and AC hPVL and HAM, **b and c)** Wilcoxon signed-rank paired test; * $P<0.05$, ** $P<0.01$, *** $P<0.001$, **** $P<0.0001$.

Supplementary Figure 5. Phenograph clusters. **a.** Bar plot showing the number of DP T cells in each of the 12 clusters identified by Phenograph. **b.** Box and whisker plot showing the percentage of DP T cells from each clinical group in the different Phenograph clusters. Each dot represents an individual ($n=11$ per group). Wilcoxon signed-rank unpaired test, * $P<0.05$, ** $P<0.01$, *** $P<0.001$ for comparisons between UC and AC IPVL, AC IPVL and AC hPVL, AC hPVL and HAM.

Supplementary Figure 6. ThPOK and RunX3 and PVL correlation. **a.** Line graph showing the expression of ThPOK with PVL in UCs and ACs ($n=11$). **b.** Line graph showing the expression of RunX3 with PVL in UCs and ACs ($n=11$). **a and b)** Pearson correlation coefficient (R) and p value.
