**Supplementary Figure 1: MET and SEMA recombinant proteins.** (B) Protein SDS-PAGE showing recombinant MET and SEMA proteins after expression in Expi293 cells and affinity purification.

Supplementary Figure 6: Binding of 69B287 and 87B156 mAbs to cancer cell lines. (D) Left panel: Western blot

analysis showing pERK and ERK levels in CAL-51 breast cancer cells treated with mAbs 69B287 and 87B156 at the

indicated time points.
