

Supplemental Figures

Anti-SR-BI used in the western blot was customer made from Sigma. The antibody was verified with tissues from SR-BI null mice.

Supplemental Fig 1. C57BL/6J mice were challenged with cecal ligation and puncture (CLP) and the adrenal gland were harvested at the indicated times and subjected for western blot analysis. The expression of adrenal SR-BI was normalized by the expression of actin. (n=3). *p < 0.05, **p < 0.01

Supplemental Fig. 2. C57BL/6J mice were challenged with CLP for 3 and 24 hours and serum ACTH levels were quantified. Data are presented as means $\pm$ SEM.
